---

### **Information Designer**

I take complex systems and make the process of using those systems simple and enjoyable through the application of appealing design and common sense.

---

#### **Professional Experience**

##### **University of California, Office of the President**

California HIV/AIDS Research Program  
Lead Production and Usability Expert, 2007 - 2009

- Developed new program branding and identity (logo, print collateral, website).
- Completed - as lead developer - the state-wide HIV/AIDS education website in collaboration with the State of California Department of Public Health connecting large counties and smaller communities, which reduces time and resources dramatically to accomplish required duties.
- Designed all print materials for multiple international HIV/AIDS conferences expanding program globally.

##### **University of California, Office of the President**

Human Resources and Benefits  
Information Designer, 1997 - 2007

- Built and managed complex and dynamic university-wide and internal websites.
- Assigned and oversaw duties for department staff.
- Increased capacity to meet growing demand for digital content and development needs.
- Trained department staff in web production and content development increasing individual career skills.
- Maintained servers for database and web applications in-house saving \$30,000 in outsourcing costs.

##### **Jack of All Trades, Inc.**

Web and Graphic Designer, 1996 to 1997

- Lead designer and developer for the Stanford Business School website.
- Established progressive online presence, increasing student enrollment.
